Moneyfacts®

Awards 2026

Categories and Methodology

RESEARCH CATEGORIES

These categories are assessed solely by researchers at Moneyfacts Group plc and incorporate product data gathered over the preceding 12 months, as well as our own industry insight.

SURVEY CATEGORIES

In these categories, we survey our broker and business community for their opinion on providers in each sector, requesting testimonials on those organisations that they have worked with. This is completed alongside Moneyfacts Group plc’s own due-diligence and industry insight.

RESEARCH AND SURVEY CATEGORIES

These categories are assessed via a combination of the above two methods.

BROKER CATEGORIES

These categories comprise a process of self-nomination via an online entry form and/or our own industry discussions and insight to form the shortlists. Shortlisted companies are then able to invite their own advocates to submit testimonials on their behalf via an online form. Alongside the original assessment, this then informs the final positions.

INNOVATION & BEST USE OF TECHNOLOGY CATEGORY

This category involves a wide-net approach to ensure all relevant innovations are included in the assessment process. This includes self-nomination, nomination by a survey of our own broker and business community, and/ or our own industry discussions, research and insight.
