Home Screen

A customisable dynamic dashboard offering all crucial insights. This combines near-live data from the London Stock Exchange for Swaps, Gilts, and Money Market rates, along with daily SONIA rates alongside daily Moneyfacts averages for savings, business deposits, buy-to-let and residential mortgages. The latest product updates in those markets are tracked on the left-hand side, with a host of other market indicators on the right.

Latest Product News

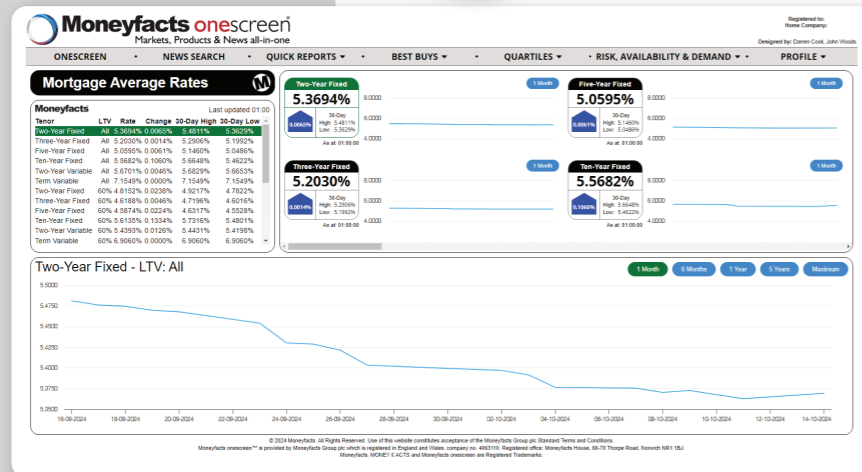

Including Stop Press News highlights product updates, keeping you informed as soon as they appear on our database.

Interest Rate Swaps

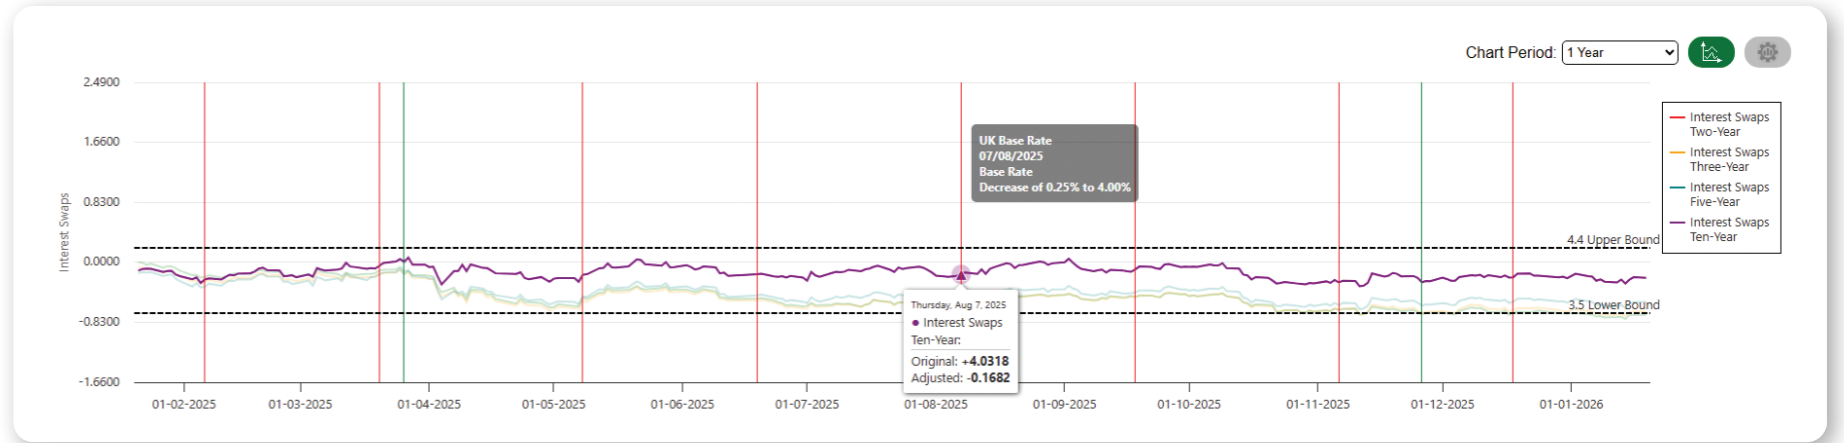

Ability to view intraday movement as well as longer term trends across multiple tenors. Putting you at the forefront of pricing decisions.

USABILITY & FEATURES

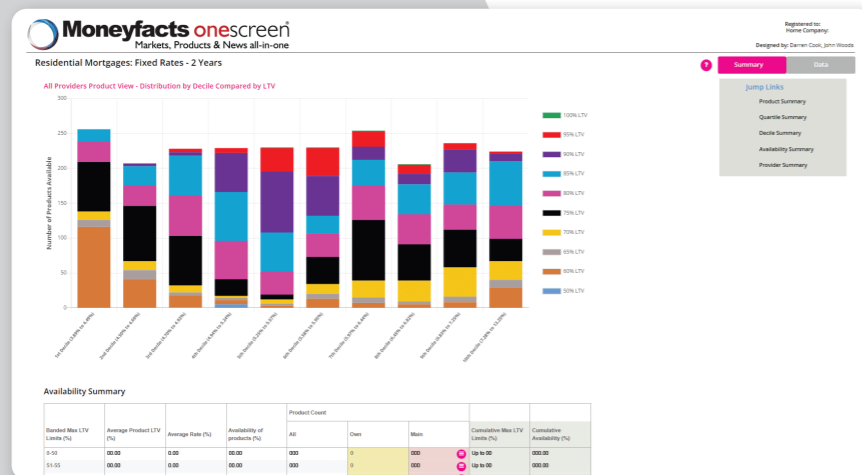

Mortgage Average Rate

The average rate of the core UK Mortgage market, accessible over the most popular Terms and LTVs, going back to 2011!

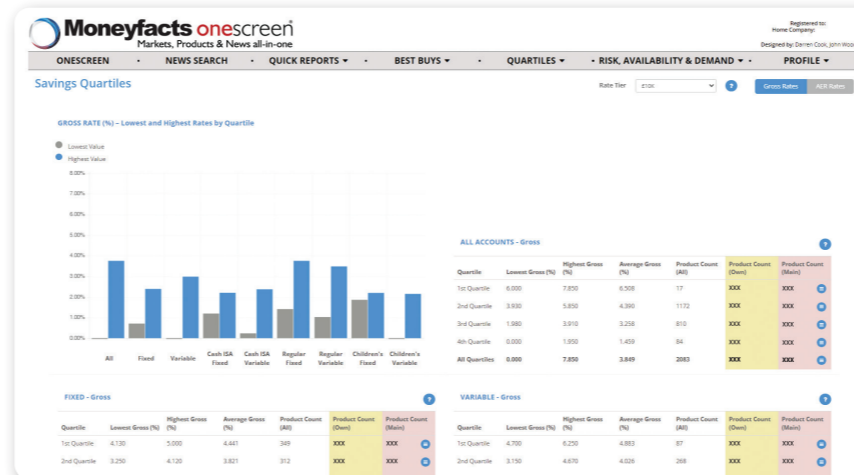

Overlay Screen

Compare multiple tenors using graph overlay configuration with bounding and margins. Also, configure graphs' line style, colour and width to easily distinguish between your selected data sets. Your configuration will be automatically available when you next log on.

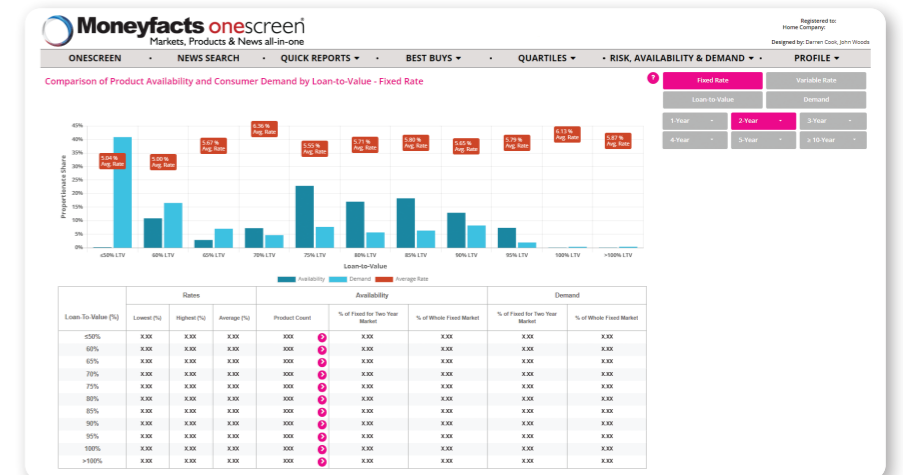

Quick Reports

Whole of market product data, returned in seconds! Accompanied by powerful analysis, including Provider, Product and Availability Summary.

Quartiles

Rate-tier quartiles to show where your products and those of your competitors sit within the overall market. Rate tier can be adjusted and can choose between Gross or AER.

Risk Availability & Demand

Incorporating consumer data from our comparison site, easily compare what customers are searching for with what is available on the market.
